

Dear Members,

MONTHLY NEWSLETTER

Clubhouse Refurbishment and Maintenance

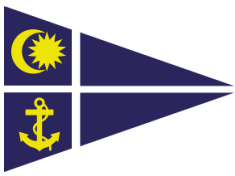

The clubhouse is currently undergoing restoration works on the damaged timber structures, fittings and electrical maintenance. Kenanga bar and the dining room timber works have been fully restored together with the painting job completed. All the old vertical blinds have been replaced with new curtains, rendering a contemporary decor.

Our committee member, Mr. John Rajoo who is in charge of the portfolio recently conducted a training exercise with our Club's Security Guards. The purpose of the training is to highlight the various security issues, such as identifying and reporting of any suspicious activities in the club. This exercise will continue from time to time to tighten and enhance security and safety measures.

Security and Safety Training Program

Environment and Landscape

The club has recently contracted a gardener to upkeep the club sidewalk, driveway and parking lot area. Other job includes trimming, edging of flower beds and ground works. The Committee is working on the beautification plans to improve the overall environment and landscape of the club. On our commitment to recycling, our restaurant food waste is being used to process organic fertiliser for the plants in our club compound. In the coming months, we plan to launch the Green Environmental Awareness Campaign.
