YARD OFFICE & REGATTA STORE

Refurbishment works has just been completed on the building. All rotten wooden structures were replaced and the roof was repaired and given a fresh coat of paint. The newly constructed waterproofing barricade was extended to 3ft height around the building perimeter to prevent water flowing beneath the building during the phenomenal spring tide that overflows to the car park a few times in a year. This would usually result in water remaining stagnant and the rubbish getting trapped underneath the building.

The situation is more dangerous when stagnant rain water becomes a mosquito breeding ground. The health and safety of the security guards living behind the same building is the utmost priority and measures are taken to provide RSYC staff working a safe working environment.

HIGH TIDE AT RSYC – THURSDAY 11TH OCTOBER 2018
